МЕТАДАННЫЕ ДЛЯ ПОИСКА В RAG-СИСТЕМЕ

Файл: 12-agile-principles-poster-EN.pdf

Тип: руководство

Темы: Агильность, Работа с клиентами, Принципы Агилности, Разработка программного обеспечения, Техническая эксг

Уровень: средний

Ключевые слова для поиска:

- Агильность
- Клиентоориентированность
- Работа с клиентами
- Принципы Агилности
- Разработка программного обеспечения

Краткое описание:

Документ представляет собой руководство по принципам Агилности, описывающее основные принципы и подходы к разработке программного обеспечения.

THE **12** AGILE PRINCIPLES

1   Our highest priority is to satisfy the customer through **EARLY AND CONTINUOUS DELIVERY** of valuable software

2   Welcome **CHANGING REQUIREMENTS**, even late in development. Agile processes harness change for the customer's competitive advantage.

3   **DELIVER WORKING SOFTWARE FREQUENTLY**, with preference to a shorter timescale

4   Business people and developers must **WORK TOGETHER DAILY** throughout the project

5   Build projects around **MOTIVATED INDIVIDUALS**. Give them the environment and support they need, and trust them to get the job done.

6   The most efficient and effective method of conveying information to and within a development team is **FACE-TO-FACE CONVERSATION**

7   **WORKING SOFTWARE** is the primary measure of progress

8   Agile processes promote **SUSTAINABLE DEVELOPMENT**. We should be able to maintain a constant pace indefinitely.

9   Continuous attention to **TECHNICAL EXCELLENCE AND GOOD DESIGN** enhances agility

10   **SIMPLICITY** - the art of maximizing the amount of work not done - is essential

11   The best architectures, requirements, and designs emerge from **SELF-ORGANIZING TEAMS**

12   At regular intervals, **THE TEAM REFLECTS** on how to become more effective, then tunes and adjusts its behavior accordingly
